PREDICT PROTOCOL

About Us

We are a bunch of crypto enthusiasts with a bug for sports. So, we thought, why not marry these two concepts and create a better version of something so ubiquitous i.e online sports betting. We are a community-driven offering that empowers players to indulge in real-time sports betting and earn rewards in the form of NFTs as well as distributed NFTs, thus allowing shared ownership of assets.

Predict360 is a distributed smart contract platform that enables users to experience a seamless fantasy sports betting experience. Our platform is also powered by a deflationary smart contract that is integrated with the Binance Smart Chain. This ensures an extremely high liquidity for users on the platform, as a percentage of every transaction made is locked in a PancakeSwap LP. Hence, Predict360 offers you the thrill and enjoyment of sports betting while making sure that your funds and rewards are well taken care of.

PREDICT PROTOCOL

[Benefits](#)[Tokenomics](#)[About Us](#)[Markets](#)[Connect Wallet](#)

Benefits

Automated LP

Predict360 is a self-generating liquidity pool that locks the 10% value of each transaction in a PancakeSwap LP. This deflationary mechanism ensures that we offer high liquidity to our users and keep them incentivized to hold PRED tokens even while they are not betting on our platform.
